

The 12th edition of the SFBV congress gathered 92 participants from France, the UK, Germany, Spain and Brazil between July 16th and 18th 2019 in sunny Strasbourg. The attendees could appreciate the diversity and the richness of the topics covered in Plant Biology from molecular mechanisms to evolution and adaptation to environmental stresses. This conference allowed PhD students, often supported by a travel grant from the SFBV, to present their work alongside some of the most recognized researchers of European Plant Biology and to exchange with them in a relaxed atmosphere. The SFBV warmly thanks Jean Molinier for the organization and acknowledges the support of the University of Strasbourg and of the Institute of Plant Molecular Biology (IBMP). You will all be welcome to the next edition, which will take place in Montpellier in 2021.
