**BIENNIAL ISSS  
CONFERENCE**

**CHALLENGES OF SEED SCIENCE  
IN A CHANGING WORLD**

**03 - 07 JULY 2023 | PARIS - Sorbonne Université**

# THE ISSS CONFERENCE

## PRESENTATION

The ISSS Conference is a biennial conference organised by the International Society for Seed Science. Its goal is to promote research, education and communication around the seed biology and its issues.

At this prestigious scientific conference, 200-400 researchers, students and stakeholders from all over the world come together at cutting-edge conferences to share their advances and debate the future of science.

The 14th Biennial ISSS Conference will take place July 3-7, 2023 in Paris, at the Faculty of Science and Engineering of Sorbonne University (Pierre and Marie Curie Campus). This is the first time since 1992 that France hosts this high-level conference.

Throughout the congress week, participants will have the opportunity to attend conferences given by renowned speakers. The congress will include poster sessions and an attractive social programme to make the most of the current scientific knowledge and the unique setting offered by Sorbonne University. The conference days will be punctuated by gourmet coffee breaks and the meals will be moments of convivial sharing.

**Organization: Seed Biology Lab (Sorbonne Université) with the participation of IRHS Angers and IJPB Versailles**

# THE ISSS CONFERENCE

The 14th Biennial ISSS Conference is entitled "Seed science in a changing world". The proposed lectures will all deal with topical issues that have real implications for the scientific and agricultural future of our world. They will cover the following topics:

- Biodiversity and plant species protection
- Seed biology under environmental changes
- Global change, adaptation and seed ecology
- From genes to seed biology, novel issues in molecular mechanisms and beyond
- Seed engineering

This conference will also be a way for participants to get to know the French heritage through a unique social programme. Indeed, two visits are planned during the conference. The first will take participants to the prestigious Vaux-le-Vicomte castle, while the second will allow them to taste the famous Pommery champagne directly at the heart of the estate.

To conclude the conference with a final moment of sharing and exchange, the 14th Biennial ISSS Conference will give way on Thursday evening to a gala dinner organised on a Rooftop.

# THE ISSS CONFERENCE IN BRIEF

The ISSS Conference  
is biennial

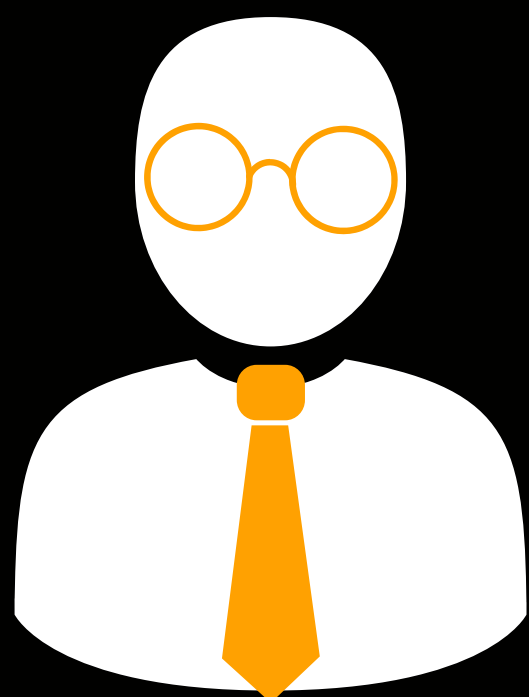

## KEY WORDS 2023
